

Eco-Smart Membrane Metal Roof Coating WSM4

Description

Weatherskin eco-smart membrane metal roof coating, WS M4 is a proprietary, high performance acrylic elastomeric membrane. Excellent long-term metal protection, UV rated. Extreme temperature rated for substrate protection. Specific for all metal roof applications.

Features

Weatherskin eco-smart membrane metal roof coating WS M4 is perfectly adjusted to allow it to utilize its tensile strength and elongation properties. Great long lasting protection, and excellent durability for most metal roofing applications. Joint and lap protection that prevents moisture intrusion and prolongs lifespan of substrate.

Uses

- UV protection for all metal roofs
- Protection against leakage and moisture intrusion
- Bonds well to all metal, steel and galvanized roofing materials and structures
- Extreme weather protection
- Mold, mildew algae protection

Color	Black or white
VOC	Less than 30 G/L
Finish	Flat/matte
Solids	65% - 68%
Application	Airless sprayer 2300 - 2700 PSI 0.019" - 0.023" tip Brush and roller application
Limitations	Maximum operating temp 120°C (250°F) Minimum operating temp -50°C (-58°F)
Number of Coats	2 - 4 recommended
Flash Point	N/A
Drying Point	20°C (68°F) + 50 - 65% RH 1 - 2 hours to touch 4 hours to re-coat
Life span	1 year unopened
Clean-up	Soap and water
