PRODUCT WARRANTY AVAILABLE

Introducing WS-106 GREEN CONCRETE EPOXY

Our 100% solids, green concrete epoxy primer is a polyamidoamine blend that allows for application the moment the surface can withstand foot traffic. No more waiting 14-30 days for full curing. WS106 even cures when a surface is wet and the coating is submersed, so rain applications are no problem! Blocks off-gassing and creates extra strength throughout the concrete itself. The product is also ideal for checkplated sheets and other steel surfaces that are in need of protection or restoration. Designed for 1 coat applications up to 20 mils thick!

LARGE VARIETY OF ACRYLIC FLAKES ALSO AVAILABLE!
